Charleston. So Carolina
Sept. 16. 1837.

Dear Sir,

I have shipped this day by, a small box of Plants, contents as the other bill. I am sorry that I could not send you all you wished for & the delay in sending, you will learn the reason of, from the Person to whom I have entrusted the care of the very unpleasant disappointment. I have added a few native plants at their low prices as I think you will not object to. & you can find customers readily - I send them merely as a sample if you will have a greater variety, please let me know & I will send them on with as little delay as possible. I would like to have plants of that curious species of Hog, Cutleaf the Dionea Muscipula. - By fellow Passenger from Savannah served me a country turn & not delivering the basket I entrusted to his care addressed to my friend Mr Vasle, I wrote to you as well. I have been a great many days absent away from Charleston for most of my personal care, the greater part of my last month's letter of plants perished - but I had objects to attend to & more on the sticking by them & I must make the Americ[illegible] pay in England for the Defaulters from there. [illegible] shipped a few days, a large bottle as many as my box of Plants. My time is the whole, so much occupied to take every advantage of the season, but I have hardly had a moment leisure since I arrived. I think you must like last cool weather, from the season here. The spring is both a very suitable Country to the deep sand of Carolina. On Friday Next I set off on another Journey about 150 miles to the Northward & Westward of this in Country to return within 10 or 12 days; in the mean time, I shall be writing. I am about arranging some business here which as early as it is settled. I will have the pleasure to write but replies to you shortly.

Yours truly I am Dear Sir
Your obliged Humble
Servt

Mr Grant Thorburn
